

# SEASHORE

**A**  
The sea and seashore are beautiful and we must preserve them

**B**  
The plants in the marine environment help us to stabilise our climate

**C**  
When countries run out of fresh water they can use sea water to drink by taking the salt out of it

**H**  
If the marine plants are polluted many living things will become extinct

**D**  
The seas are full of plants which provide oxygen for all marine life

**I**  
The seas provide a place for humans to get rid of their waste

**E**  
Plants in the sea provide all the food for the animals

**F**  
The seas are full of undiscovered plant and animal species which may be very important to humans

**G**  
The seas and the seashore are great places for humans to relax and have holidays

**J**  
Fish eat small marine creatures which eat marine plants and the fish provide jobs and food for people
