

# STEM INSIGHT into Modern Industry

Learn about how businesses work, what roles and skills are needed, the breadth of career possibilities and the variety of routes into jobs, particularly technical paths and apprenticeships.

STEM Insight placements equip teachers, technicians and careers staff with real-life knowledge and experiences, helping to bring careers to life in the classroom.

This residential course will provide the opportunity to get hands on experience of a range of businesses and employers in the South West of Scotland including Scottish Power, GE Caledonian, FMC Alginates, Grants Distillers and Emergency One.

Educators will develop an understanding of the skills required to be successful in industry, enabling them to take these messages back to their school and thus enhancing the learning experiences of young people.

To register interest please email [Insight@sserc.scot](mailto:Insight@sserc.scot)

<b>STEM Insight Residential</b>
